## Executive Director's message

Dr. Abdullah Abdul Qadir bin Othman  
CEO

Al-Awn Foundation for Development

### In the beginning a word...

If we were unique in crafting its letters, and gave it our utmost attention, it would not have helped us in conveying the extent of our love, affection and appreciation to your honorable person who reads the sides of this annual report for the year 2021. All love and appreciation are mixed with all meanings of affection and reverence, with best wishes for abundant health,

wellness and safety.

We at Al-Awn Foundation for Development are very keen to select our projects and programs with high accuracy, and with a studied description, in line with the sustainable development goals of the United Nations, and in a way that achieves the common good. In the past, people were deprived of education, but today they are able to formulate unique pieces of literature, not to mention those grieving groans, and the continuous and successive aches that have always ranged from the bodies of those exhausted by illness. Thanks a lot, to everyone who contributed with effort, thought, or implementation.

The nature of the work in the Foundation's projects goes through a series of procedures and models that will establish governance in our projects. The best standards, conditions and specifications conducive to the implementation

of projects are chosen with high professionalism and competence, which reflects their positive impact on the target community, and achieves one of our strategic goals in the Foundation. Al-Awn for Development (contributing to the sustainable development of the target communities).

Dear reader of the letter, we are overwhelmed with joy, and happiness appears on our faces, as we see and see the outcome and impact of our projects in Al-Awn Foundation for Development. You can imagine the pride that fills our chests when we see that more than 91,423 beneficiaries of health services provided by Al-Hajrin Hospital and the mobile clinic, or To see that more than 2,567 beneficiaries of the educational and rehabilitation programs launched by the Foundation throughout the geographical area of the country's governorates, not to mention that scholarship students have

published more than 3 scientific researches in international peer-reviewed journals whose impact factor exceeds 8 degrees and is considered a very advanced degree, Or should we tell you about a scholarship student obtaining the famous European student exchange scholarship (Erasmus) in Poland, which only a few around the world receive, and many, many more honorable and inspiring numbers and statistics that you will see in detail in this report.

As we conclude this year with all that it contained of various programs and projects, we happily seek to achieve many strategic partnerships with international, regional, Arab and local organizations, and we are urging steps to crystallize these distinguished relations. To be reflected in the form of programs and projects by which we serve our society, striving in all of this to achieve development that shapes the future.

# Interventions per governorates

# Governance system in Al-Awn Foundation for Development

There is increasing interest in the concept of governance in companies and non-profit sector institutions as a modern global trend because of their preservation of rights, balance of interests, creation of an appropriate environment for sustainability and growth, and achievement of global and international standards, in order to sustain the work of these companies and institutions, enhance their contribution to development, and enhance the efficiencies of spending on grants, through Various monitoring and accountability tools

Al-Awn Foundation for Development pays great attention to its governance system and works to continuously develop it through the application of the international which is reflected in its internal administrative system (the institutional management system), as well as through the accreditation of ,(2015/standard ISO (ISO9001 :major international companies in the implementation of auditing and review processes. Both internal and external (2015/Executing ISO external audits (ISO9001 - .Executing external audits - .Implementation of internal audits -

.In order to improve and improve the outputs of the non-profit sectors and achieve their objectives

## Education

Al-Awn Foundation for Development considers education its first priority, as it believes that education works to achieve the goals of sustainable development, address contemporary and future challenges, and solidarity for society's economic recovery, progress, advancement, and civilization. Through its interventions it seeks to contribute to reducing the level of education poverty and achieving the fourth goal of sustainable development goals in providing quality education, and this year we set out to build capacities, transfer knowledge and enhance the reading level of students to provide quality education in accordance with international best practices.

# Contributions of Al-Awn Foundation for Development projects in achieving the goals of

**1 NO POVERTY**

**eradicating poverty**

- providing job opportunities for the youth
- Training young people on best practices
- Livelihood support
- Training for Empowerment Project
- Salem Bin Mahfouz Schools
- Educational support services in the countryside
- New Horizon Leaders

- Learning spaces
- Bin Mahfouz National Schools Project
- Educational support services in the countryside

## New Horizon Leaders (HNL) Scholarship Project

Within the framework of its development for young people in the scientific fields, Al-Awn Foundation for Development launched its New Horizon Leaders project (NHL) for scholarships in Yemeni and foreign universities with the aim of developing human capital, providing society with qualified scientific cadres, and providing opportunities for young men and women to obtain university education, in order to achieve greater opportunities for them. In joining the labor market, during this year we provided 55 full scholarships for bachelor's, master's and doctoral courses.

### 1) Total students:

**214** (44 external, 170 internal)

### 2) The ratio of males and females:

(65.4% males 34.6% females)

### 3) Scholarship countries:

(Yemen - Canada - Egypt - Turkey)

#### 4) Scientific disciplines:

##### a) Medical:

Medical fellowship

Research doctorate in medical sciences

- Medicine

- Health sciences

##### b) Various engineering and computer disciplines

##### c) Various educational specializations:

(all academic degrees / Bachelor's

- Master's - PhD)

##### d) Postgraduate

##### Administrative Studies:

(Information Systems Management

- Business Administration -

Management and Organization -

Economics)

##### e) Humanities:

(international law and legislation

- international relations and public

administration - political sciences)

#### 5) Companion programs:

a) Leadership programme:

b) New Horizon Leaders Forum, which hosted more than 150 internal scholarship students

c) Dialogue sessions to map the accompanying training during their university years

#### 6) Notable Achievements:

- Publishing more than **3** research papers in international peer-reviewed journals with an impact factor exceeding **8** degrees

Participation in a literary publication at the Cairo International Book Fair

- One of the students obtained the famous European student exchange scholarship (Erasmus) in Poland.

- More than **655** volunteer hours at home as a participant in various humanitarian community activities.

## Partners for the quality of university education in Yemen project

Proceeding from the goals of sustainable development and with the aim of increasing the competitiveness of Yemeni universities in the international rankings of universities and to ensure access to high-quality education that provides young people with job opportunities that contribute to reducing unemployment, the Foundation implemented, for the second year in a row, in partnership with the Ministry of Higher Education, Scientific Research, Technical Education and Vocational Training, a project Partners for the quality of university education in Yemen in 7 governorates in 8 universities. The training program is focused on building and measuring leadership and administrative competencies. It is provided by specialized international experts. The program targets the leadership of universities, colleges of education,

the Holy Qur'an, and faculty members. The program includes training courses, workshops, knowledge transfer, and a forum for universities. Participate and produce projects that contribute to the development of various aspects in universities

### Training themes

1. Change management.
  2. Managing the strategic plan.
  3. Leading learning in universities and colleges.
  4. Leadership skills.
  5. The universality of university leadership.
  6. Financial sustainability.
  7. Knowledge and digital economy.
  8. Management by results.
  9. Community service in colleges and universities.
  10. Business English for Decision Makers.
- Participants in the courses were 53 university presidents, college deans and their deputies
  - Participants in knowledge transfer programs 358 participants.
  - Knowledge transfer programs 13 programs.
  - Projects submitted by 2021 participants.

Higher Education Quality Partners Project in Yemen  
مشروع شركاء جودة التعليم الجامعي في اليمن

## Rural Teachers Project

Believing in the girl's right to education and the need to provide equal opportunities for both sexes to obtain quality education, especially for girls in rural areas, the Rural Female Teachers Project was launched, which aims to enable rural girls to continue their university education with the aim of providing female teachers in general education schools in rural areas in Hadramout governorate and providing job opportunities For women to contribute to reducing poverty, the project was implemented in partnership with the Selah Foundation for Development and in coordination with Hadramout University and the implementation of the Teachers Training Institute, where a university center was opened in the Dawan district, which includes **184** girls in a bachelor's course in **4** educational specializations. The project also

included the rehabilitation of **21** girls in the Rakhiya area in the educational diploma course.

### Undergraduate course:

- Targeted districts: (Dawan, Hoorah, Wadi Al-Ain, Harida)
- The targeted areas in the districts are **33** rural areas.

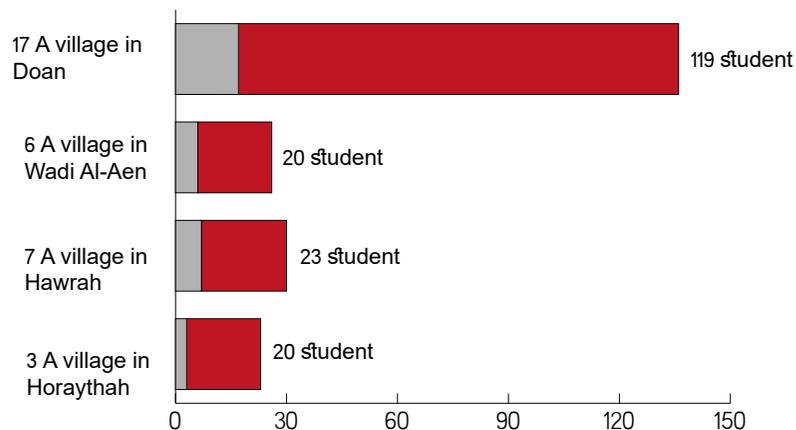

- Specializations (Arabic language, mathematics and computer, science, social studies)

### Diploma course:

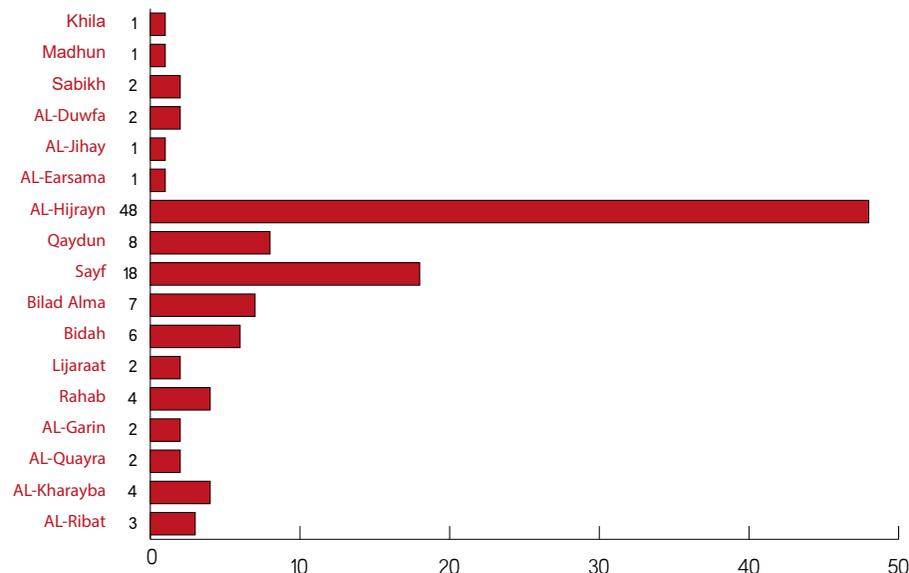

- District: Rakhiya
- Number of targeted areas: **10** areas

- Class teacher specialties. Mathematics. Arabic Language
- The population of Rakhiya district: **13,160** people (**6,185**) males (**6,974**) females

- The percentage of general education students (**1,970**) male and female students, **784** female students
- Girls in secondary education are **30** girls, or **4%**

The number of female beneficiaries and the number of targeted villages

Distribute the students to the regions

## University volunteer initiatives project

We believe that development is achieved by involving all members of society in addressing development challenges, and through voluntary work whose spirit is imbued with many values, including appreciation, solidarity, good belonging and empowerment, we can direct the energies of youth towards construction and development and achieving peace, justice, equality and freedom. The Initiatives Project Voluntary is one of the contributions of Al-Awn Foundation for Development in promoting youth volunteer work in society, especially in university circles. The Foundation launched its project in 2016 for young people to adopt the improvement of the educational environment in their universities and raise the level of competitiveness for it in

international rankings. In 2021, the project contributed to stimulating volunteer work from By adopting 15 volunteer initiatives in 3 Yemeni universities

### - The targeted universities:

(Hadramout University, Sayun University, Holy Quran University)

### - Participating colleges:

(2 colleges of education and 3 colleges of the Holy Quran)

### - Beneficiaries of the project: 21,629

### - Winning initiatives: 15 initiatives.

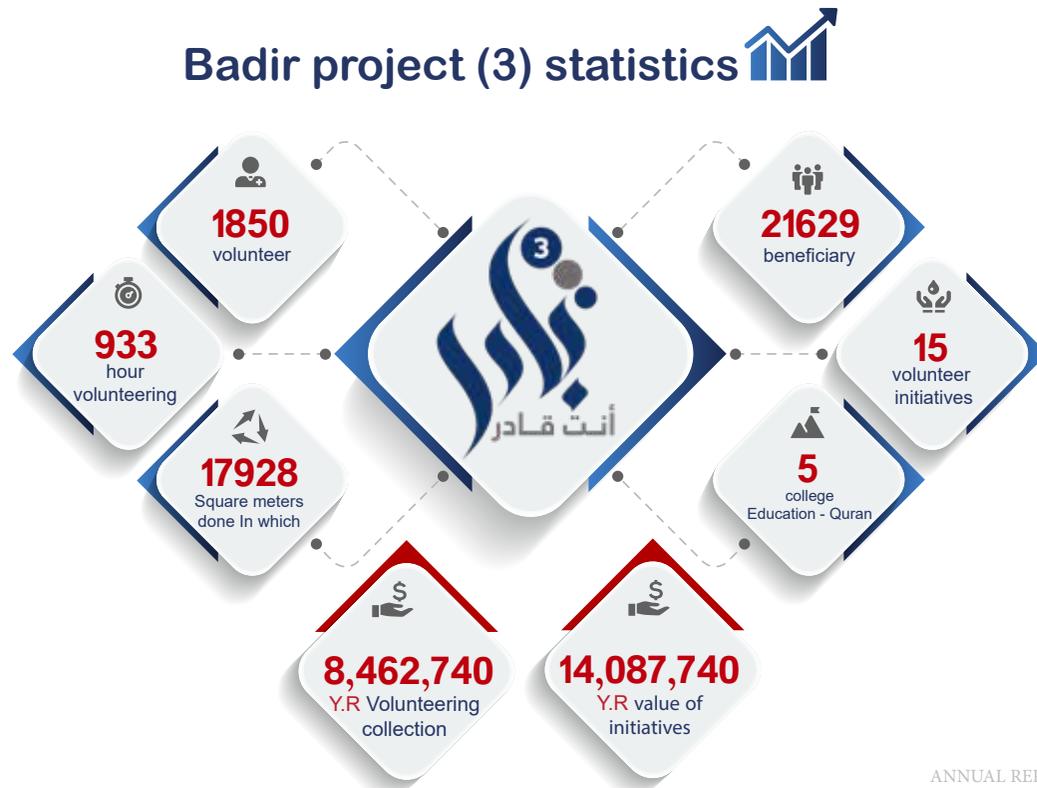

### - The financial value of the initiatives: 14,087,740

### - The financial value obtained from volunteering: 8,462,740

### - Participants in the initiatives:

1850 students, the death rate is 55%.

## Salem Bin Mahfouz Private Schools Project

-The project aims to enhance educational opportunities in rural areas with a focus on gender equality in education and to create a distinguished educational model in accordance with education quality standards. During this year, the project worked on developing educational cadres in schools through training programs for modern education strategies. The project also focused on enhancing The reading level of students in the first grades, in addition to developing the capabilities of male and female students in the scientific, skillful and behavioral aspects and promoting dialogue between young people and effective communication. of the sustainable development goals.

### - beneficiaries:

- Students: 1212  
**628** males, **584** females

- **Teachers: 106**  
**44** males, **57** females

- **Administrators: 48**  
**37** males, **11** females

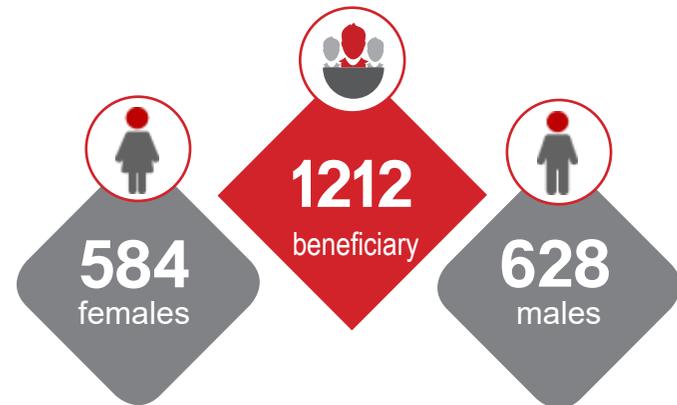

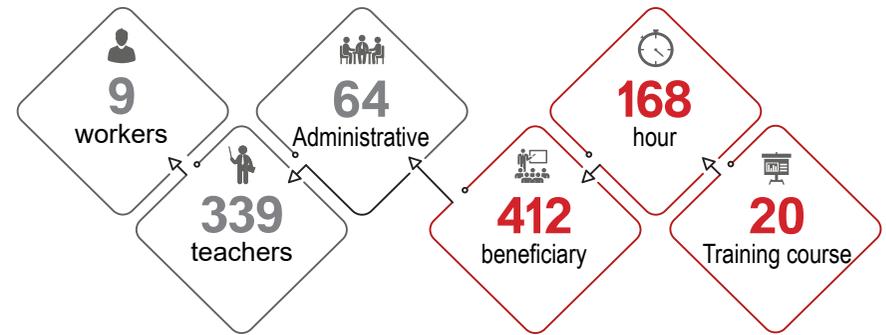

- **workers: 33**  
**27** males, **6** females

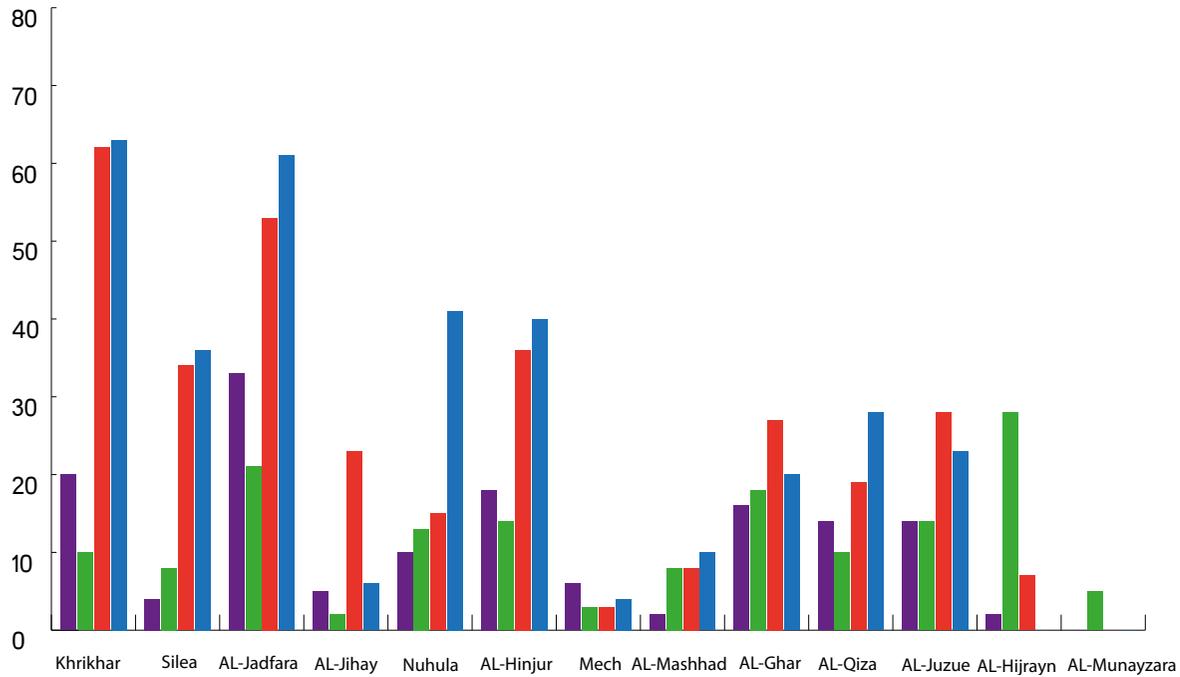

### - Achievements:

**effective personality course, school activities guide and educational outcomes document**

### Training and professional development

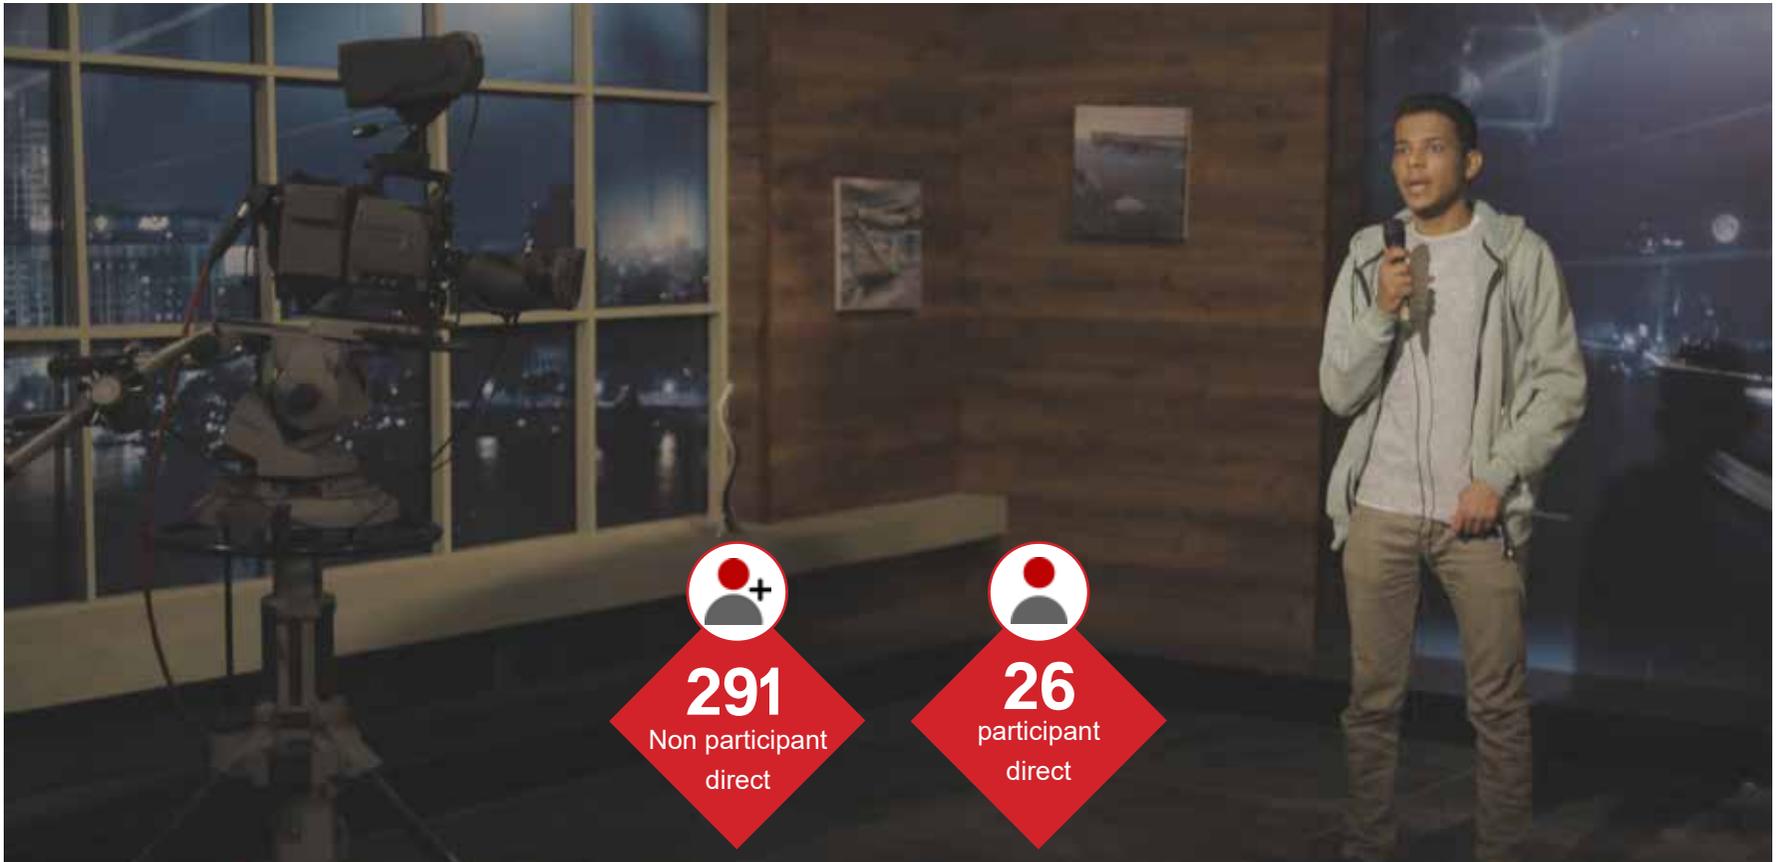

## Empowering

There are many areas of youth empowerment offered by the Foundation in education, training, culture, capacity building, health, economy and social inclusion, within the framework of its endeavor to create job opportunities for youth of both sexes, address poverty and involve them in achieving the goals of sustainable development.

## Training for Empowerment Project

Our partnership with youth focuses on capacity-building to enhance youth employment opportunities to reduce unemployment and address poverty and marginalization. Al-Awn Foundation for Development has launched its “Training for Empowerment” project to provide trainees with skills that qualify them to enter the labor market, and give them the opportunity to improve their social and economic standard of living. The project relied on Two components are empowering

graduates and enhancing the capabilities of technical institutes. The first component focused on training in the disciplines required in the labor market through direct training in external companies and institutions in the same field, while the second component focused on opening three new training areas for young people in the Industrial Vocational Institute in Mukalla and Seiyun By training teachers and equipping departments with the equipment needed for training.

### The first component Number of trainees: 20

#### Training fields:

- Human Resources Management
- TV reporter
- Interior design
- Writing the script

### The second component: Trainees: 6

#### Training fields:

- Maintenance of modern home appliances
- PLC industrial control systems
- Maintenance of diesel fuel injection systems in car engines

Students to whom

knowledge has been transferred in institutes: 291 students in institutes  
The parties that conducted the training:  
(The Egyptian Radio and Television Institute «Maspero» - The Egyptian Company for Engineering Training - ProSev Institute)

## Suluki Hayat project

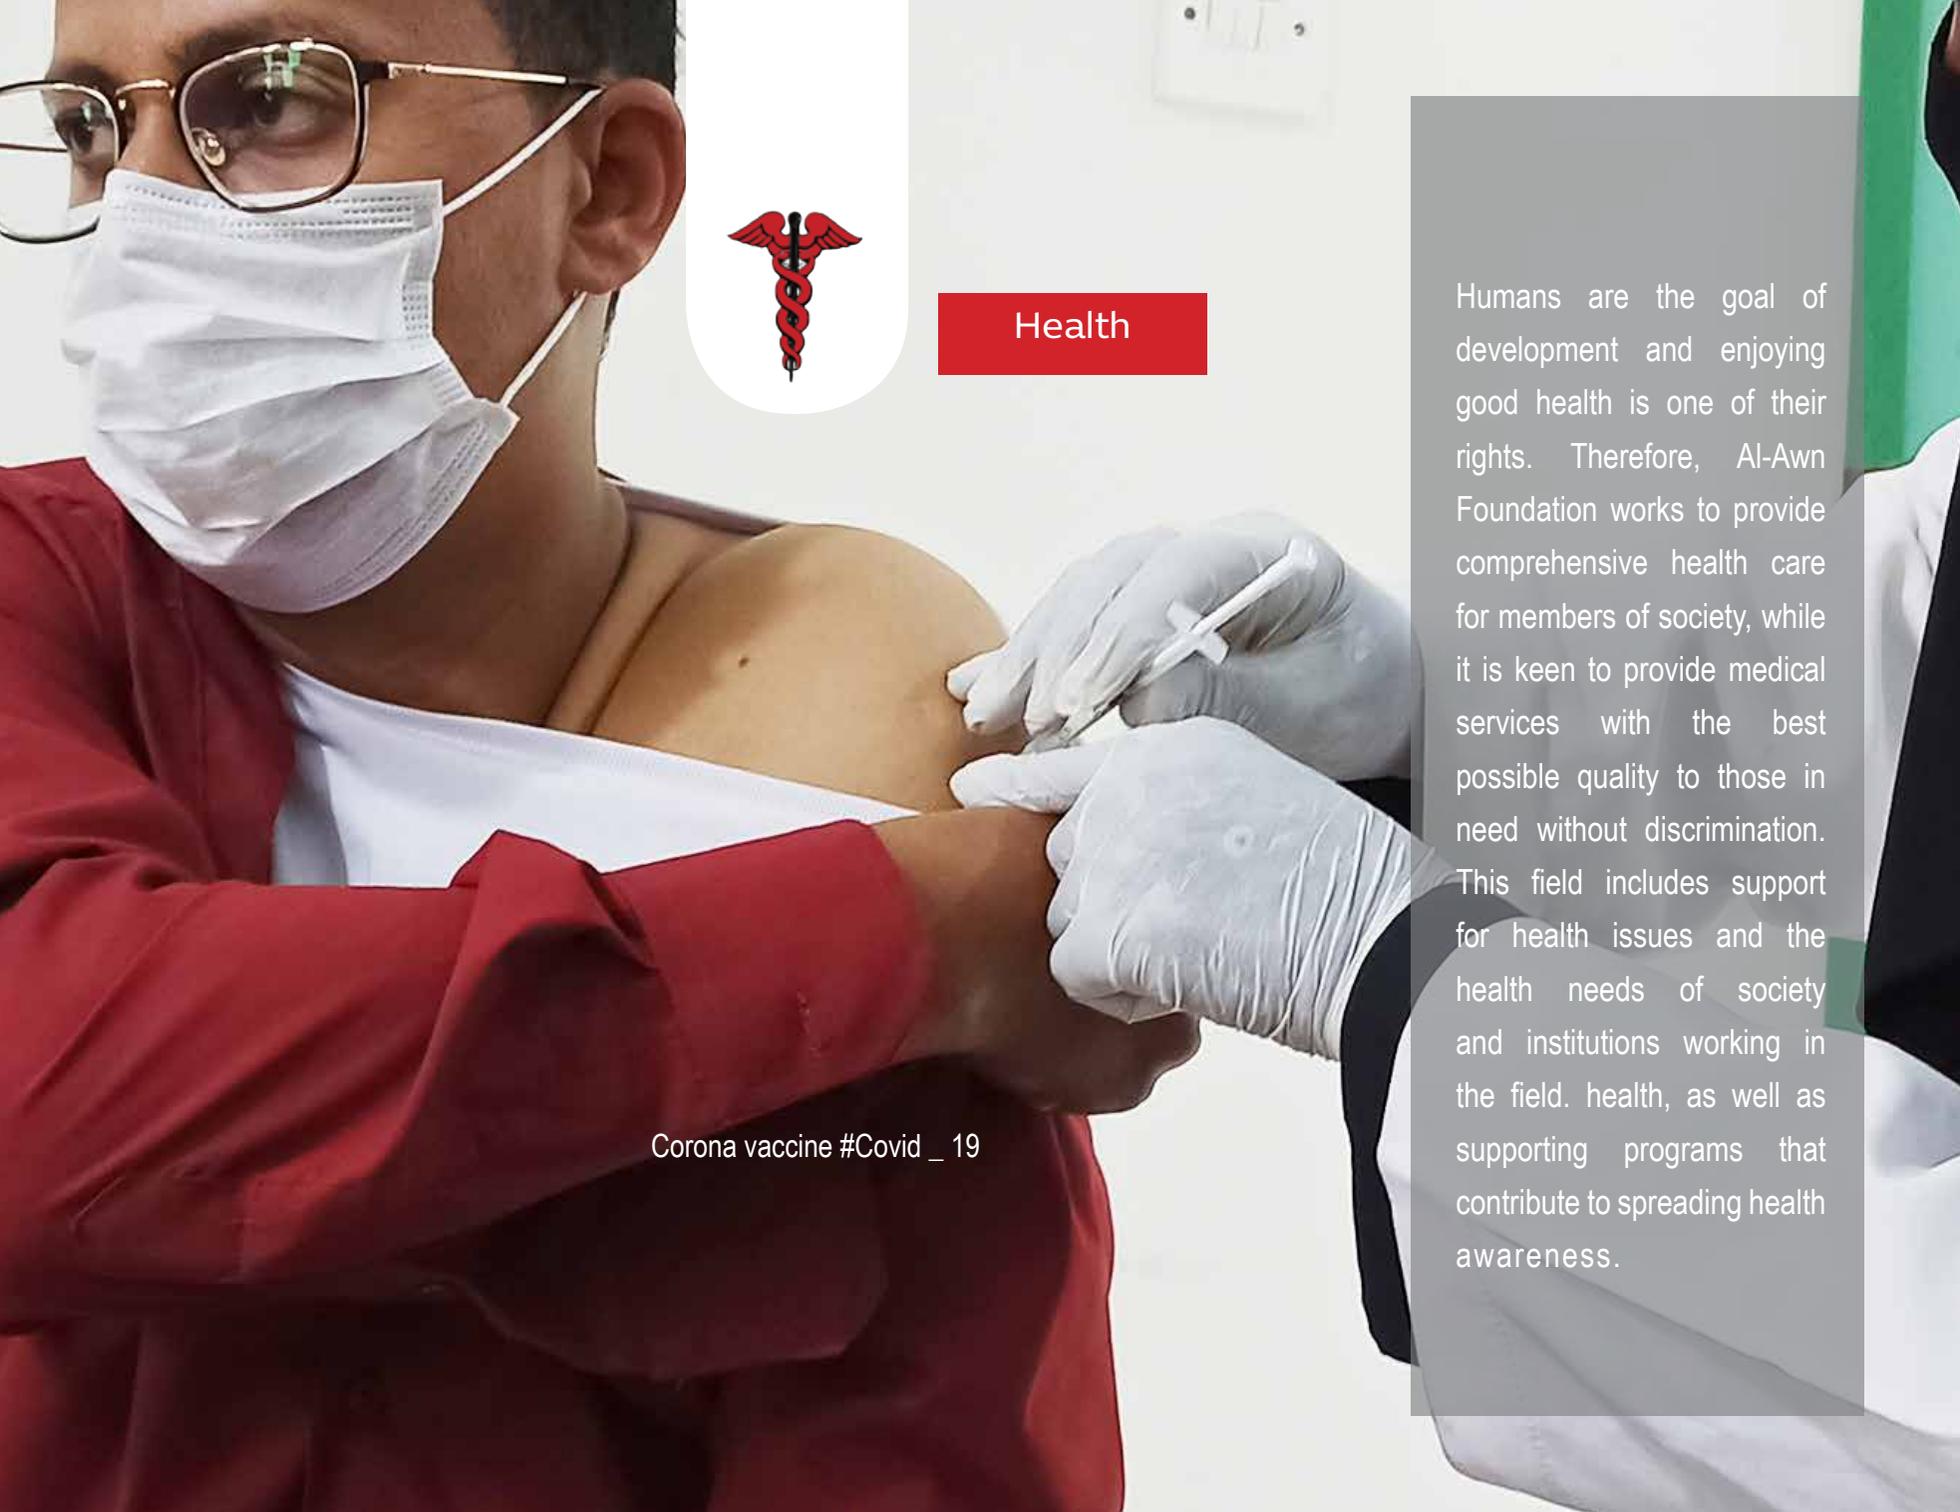

Over the past two years, Al-Awn Foundation for Development has implemented a behavioral life project to increase the community's resilience to confront the Corona pandemic that shook the corners of the world as a whole through electronic awareness campaigns, webinars, posters, production of knowledge guides, competitions, and Arkoun community (the first digital self-learning community in Yemen) in health aspects Public and personal hygiene and self-learning. These campaigns have reached more than 40 million visits in 14 countries. The project focused on building knowledge that generates behavior that reduces the burden of diseases resulting from wrong behaviors and lack of hygiene and ensures that everyone enjoys healthy lifestyles and well-being at all ages. . The project encouraged young men and women to engage in voluntary work in various areas covered by the project's activities. The participation of all groups of different ages and genders in the project's activities played a major role in achieving the project's objectives, which seek to support the health and well-being of the community.

- (14 countries - based on podcast listening statistics)
- More than 1500 volunteers
- Achieved financial value: more than 350,000 Saudi riyals

**More than 2.3 million social media users in Yemen**

## Health

Humans are the goal of development and enjoying good health is one of their rights. Therefore, Al-Awn Foundation works to provide comprehensive health care for members of society, while it is keen to provide medical services with the best possible quality to those in need without discrimination. This field includes support for health issues and the health needs of society and institutions working in the field. health, as well as supporting programs that contribute to spreading health awareness.

## A project to develop the Al-Hajerin water project (water production by solar energy)

Today, more than 15,000 people in the historic city of Al-Hajrin and its environs in Hadramout Governorate have access to clean, potable water at all times, after they had suffered from limited access to it. Where the Hajrain water project was rehabilitated, which comes to enhance the resilience of rural communities and in line with the sixth goal of the sustainable development goals. The project was launched in 2016 after conducting a comprehensive study of the needs of the region. The project included four phases. The fourth phase was completed in 2021. During the project, 4 artesian wells were drilled. (The productivity of the four wells is 155 cubic meters per hour), pumps operated by the

solar energy system were installed, 3 tanks with a capacity of 1300 cubic meters were constructed, a total of 27057.3 meters of water pipes were installed, and water meters were installed to ensure the continued availability of potable water in homes.

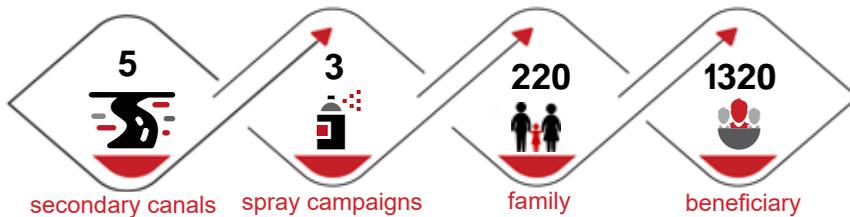

- Beneficiaries of the project: **15,000**
- Number of regions covered by the project: **14** regions
- The number of panels installed in the project is: **921** panels
- The amount of energy produced from the panels is **(252.4)** kilowatts
- Longitudinal meters of pipes installed: **(3663.8)** linear meters for main lines) + **(23393.5)** linear meters for branch lines)
- The total meters in the project: **(2112)** meters
- The total area covered by the project: **(17.93)** km from the Ghar Bin Lissoud area to the Al Mashhad area).

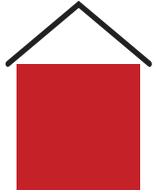

## Urgent relief project for the flood disaster in Tarim

In the aftermath of the torrential disaster in the city of Tarim and declaring it a disaster area, the rapid response of Al-Awn Foundation for Development was through three urgent interventions in shelter, health, and environmental sanitation (clearing the flood sewers), where we were able to reach 1,320 affected people, and provide non-food assistance to them, and during the project 3 mist spraying campaigns were implemented to prevent the spread of mosquitoes, and within the third component of the project, the rehabilitation of the secondary streams that were damaged by the torrential torrents.

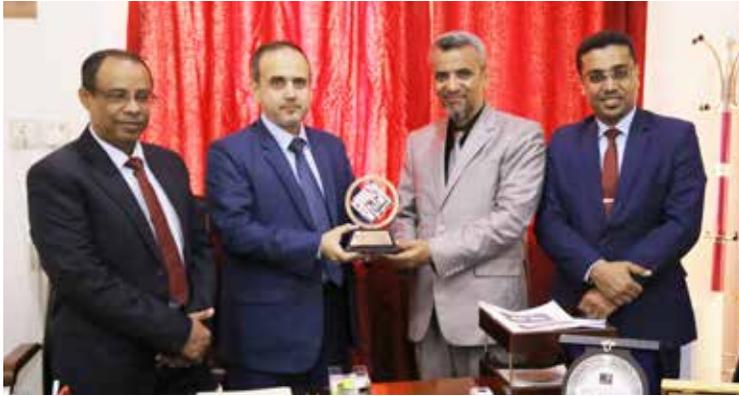

- The number of families benefiting from: **220** families / non-food assistance
- The number of direct beneficiaries: **1320** beneficiaries (**630** males **960** females)
- **3** misty spray campaigns:
- **5** secondary canals have been rehabilitated with a length of **15** km
- Street cleaning campaign from the effects of rain and torrential rain.
